

Round-rib Cushion Mat

031003 - 36 inches wide

031004 - 48 inches wide

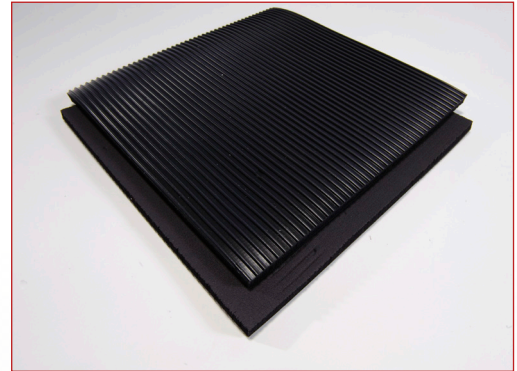

031006 - 60 inches wide

Round-ribbed mat with cushion backing is a noise-blocking mat with a closed cell backing that provides good heat and vibration insulation, and is resistant to moisture and mildew.

Round-ribbed mat is slip-resistant, tough, long-wearing, and easy to clean.

Applications include:

- Trucks
- Construction equipment
- Agricultural machinery
- Mobile equipment

Specifications and Physical Properties

Specifications:

Maximum roll length:	60 feet
Thickness:	1/2 inch
Density:	Approx. 1 lb./sq. ft.

Vinyl Layer:

Color:	Black
Thickness:	1/8 inch
Density:	.75-lbs./sq. ft.
Temperature range:	0° F to 200° F
Resistance to:	
Abrasion:	Good
Flame:	Meets FMVSS 302
Water:	Excellent
Petroleum:	Good
Alkalis:	Good

Close Cell Rubber:

Color:	Black
Composition:	Nitrile/PVC
Density:	4 To 6 lbs./cu.ft.
Water absorption:	1% Maximum by volume
Temperature range:	-20° F to 200° F
Flame resistance:	Meets UL94 – HF1 and FMVSS 302

Chemical Resistance To:

Water:	Good
Oil:	Good
Gasoline:	Good

The Federal Trade commission considers that there are no existing test methods or standards regarding flammability that are accurate indicators of the performance of cellular plastic materials under actual fire conditions. Any results of existing test methods such as ASTM D-1692 and UL94, are intended only as measurements of the performance of such materials under specific, controlled test conditions. The terminology associated with the tests or standards such as "non-burning", "self-extinguishing" or "non-combustible", is not intended to reflect properties of such products under actual fire conditions.
