

Pyramid Mat with Cushion Backing

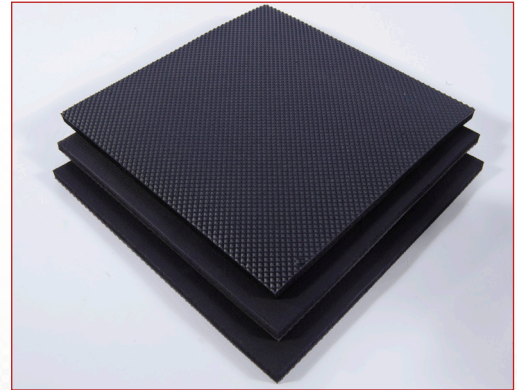

031361

A composite noise barrier floormat combining a tough, abrasion-resistant mat surface with a closed cell sponge backing.

The closed cell sponge cushion provides comfort and decouples the vinyl barrier from the direct noise source and increases its ability to block noise.

Applications include:

- Trucks
- Construction equipment
- Agricultural machinery
- Mobile equipment

Specifications and Physical Properties

Specifications:

Width:	48"
Thickness:	1/2" Thick
Density:	1 lbs./sq.ft.
Maximum Roll Length:	60 Feet

Vinyl Layer:

Color:	Black with Pyramid Surface
Thickness:	1/8 thick
Resistance To:	
Abrasion:	Very Good
Flame:	Meets MVSS 302*
Water:	Excellent
Petroleum:	Good
Alkalis:	Good

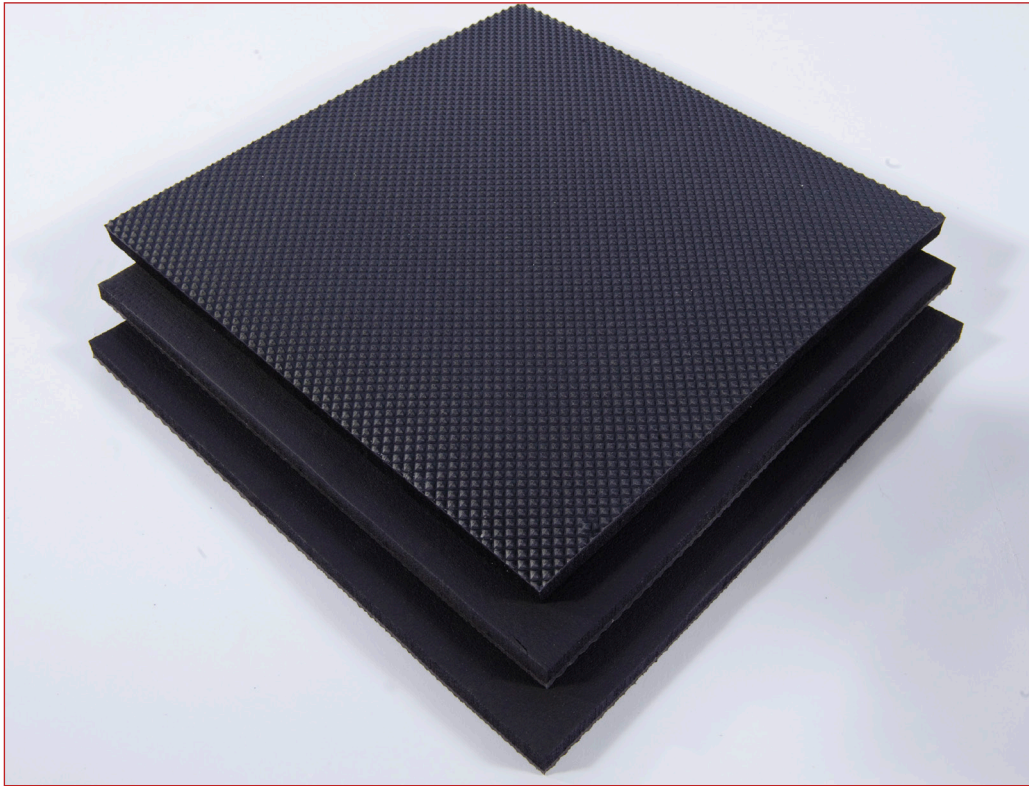

Closed Cell Rubber:

Color:	Black
Composition:	Nitrile/PVC
Density:	4 To 6 lbs./cu.ft.
Water Absorption:	1% Maximum By Volume
Temperature Range:	-20 Degrees To 200 Degrees F.
Flame Resistance:	Meets UI94 – HF1 and MVSS 302*

Chemical Resistance To:

Water:	Good
Oil:	Good
Gasoline:	Good

*The Federal Trade Commission considers that there are no existing test methods or standards regarding flammability that are accurate indicators of the performance of cellular plastic materials under actual fire condition. Any results of existing test methods such as ASTM D-1692 and UL94, are intended only as measurements of the performance of such materials under specific, controlled test conditions. The terminology associated with the tests or standards such as "non-burning", "self-extinguishing" or "non-combustible", is not intended to reflect properties of such products under actual fire conditions.
